

## RING ITINERARY DEPARTING FROM OLIANINA FARM

Distance: km 37

Trip Grade: easy, suitable for non-professional cyclists

Route: fully paved on the Right River Po banks and low traffic streets

Leaving Olianina Farm, we turn right and cover a brief

distance (only 2 Km) on the SS12 state highway until we head through Pieve di Coriano where we suggest a short stop to visit the gorgeous Matildic Church. We keep riding on the main street and we come to the River Po bank, where we turn left towards Quingentole. For this entire cycle lane stretch, the great river flows right close to the bank and gives us marvelous landscape views in all seasons.

We keep riding and come to the point (indicated in the sign here below) where it is possible to see the River Secchia flowing into the River Po.

From here we continue our ride on the Right River Secchia bank until we reach Quistello (in the small town of Santa Lucia there is only a brief dirt patch, not presenting any difficulty). Once in Quistello we climb down towards the village and we take the provincial road, and after a 2 Km long ride we turn left following the sign for San Rocco. Here we ride on very low traffic roads, surrounded by the valleys of the southern area of Mantua province. We go ahead following the signs for Schivenoglia and then for Villa Poma, where we come back to the Olianina farm.
